Subject: Microsoft Ruling

Please take stringent action against Microsoft's Monopoly. In today's current software marketplace Microsoft has a strangle hold not just on the Browser, but on the whole operating system. To make matters worse they are also the de-facto standard in business productivity applications with the .doc file. They have grown way too powerful and pervasive. What worries me as a citizen is the world wide reliance on a single computer platform. What is going to happen when a hacker writes a virus that is truly destructive and wipes out 95% of the world's data. Microsoft has shoe-horned us into a dangerously exposed technology position.

Sincerely
Vin Capone
